

FRANCOISE ELIS

DATA ANALYST

Email: elisokala56@gmail.com | Contact: +1 (202) 780- 9421 | Location: Washington DC 20019

PROFESSIONAL SUMMARY:

I am a highly skilled Data Analyst with over 10 years of experience in leveraging data to drive business insights and optimize decision-making. Throughout my career, I have successfully analyzed and interpreted data from over 1 million data points, contributing to a 20% increase in operational efficiency for key clients. My expertise includes advanced data analysis, statistical modeling, and data visualization using tools such as SQL, Python, R, and Tableau. I have delivered over 200 actionable reports that supported strategic decisions, improving business performance by an average of 15%. I am adept at transforming complex data into clear, impactful narratives, collaborating with cross-functional teams, and ensuring data accuracy and integrity throughout the process.

TECHNICAL SKILLS:

Data Analysis & Tools: SQL, Python, R, Excel, Power BI, Tableau, Apache Spark, SAS, MATLAB, Google Analytics

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, D3.js, Plotly, Excel (Advanced Charts), Google Data Studio

Statistical Analysis: Hypothesis Testing, Regression Analysis, A/B Testing, Time Series Analysis, Statistical Modeling

Data Management & Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Oracle, NoSQL, Data Warehousing, ETL, Hadoop

Collaboration & PM Tools: Trello, Slack, JIRA, Confluence, Asana, Microsoft Teams, GitHub

Cloud Platforms AWS, Google Cloud, Microsoft Azure, BigQuery, Snowflake, Redshift

Automation & Scripting: Python (Pandas, NumPy), SQL (Stored Procedures), Shell Scripting, Apache Airflow, Bash, Jenkins

EDUCATION:

Associate Degree in health sciences

University of Yaounde2

CERTIFICATIONS:

Data Analytics Certificate (George Washington University)

CS50'S Web programming with Python and JavaScript. (EDX Learning Platform)

Front -End Web Developer (EDX Learning platform)

PROFESSIONAL EXPERIENCE:

Amazon

Senior Data Analyst

Apr 2023 –

Present

- Lead data analysis projects to optimize supply chain processes, improving inventory management efficiency by 15% through advanced predictive analytics.
- Designed and implemented automated data pipelines using Python and SQL, reducing data processing time by 25% and ensuring real-time data availability for decision-making.
- Conducted in-depth statistical analysis and data visualization using Tableau and Power BI, presenting insights to senior leadership that influenced strategic business decisions and resulted in a 10% increase in operational efficiency.
- Collaborated with cross-functional teams, including engineering, marketing, and finance, to gather and integrate data from multiple sources, enhancing data accuracy and reducing errors by 20%.
- Built and maintained large-scale databases and data warehouses, ensuring the integrity of millions of data points used for market analysis and reporting.
- Utilized machine learning algorithms (scikit-learn, TensorFlow) to predict product demand trends, improving demand forecasting accuracy and reducing overproduction costs.
- Performed A/B testing and hypothesis-driven analysis to optimize marketing strategies, increasing campaign ROI for Intel's new product lines.
- Led the creation and documentation of data governance policies, enhancing data security and compliance with Intel's internal standards and external regulatory requirements.
- Worked with stakeholders to develop key performance indicators (KPIs), providing actionable insights that improved manufacturing throughput.

Emory Healthcare
Data Analyst
2023

Sep 2020 - Mar

- Spearheaded the design and deployment of advanced data visualizations with Tableau and Power BI, enabling stakeholders to easily interpret complex data patterns for more informed decision-making.
- Partnered with healthcare teams to define data requirements and create customized reporting solutions, streamlining operational workflows and providing valuable insights into patient care.
- Leveraged SQL and Python to automate data extraction and transformation tasks, enhancing data accessibility and reducing manual processes throughout the organization.
- Led comprehensive data quality evaluations, proactively identifying issues and collaborating with cross-functional teams to ensure the accuracy and integrity of healthcare data in line with regulatory standards.
- Utilized statistical techniques such as regression analysis and hypothesis testing to predict patient outcomes and optimize resource allocation, contributing to a significant improvement in patient care.
- Created and managed dynamic dashboards and reports in Power BI and Tableau, enabling the senior management team to make faster, data-driven decisions.
- Analyzed healthcare data to uncover trends, correlations, and outliers, directly informing strategic initiatives and enhancing decision-making processes within the sector.

Allied Universal Security

Data Analyst

Apr 2019 – Sep 2020

- Analyzed large datasets to identify trends, patterns, and insights that directly influenced business strategies and decision-making for clients in various industries, such as finance, healthcare, and retail.
- Developed and automated data pipelines using SQL and Python, improving data processing efficiency by 30% and reducing manual data extraction time by 20%.
- Conducted data validation and data cleaning tasks to ensure data accuracy, integrity, and consistency across multiple client databases, reducing error rates by 15%.
- Created interactive dashboards and visual reports using Tableau and Power BI, enabling senior stakeholders to track KPIs and make data-driven decisions with a 25% faster turnaround.
- Collaborated with cross-functional teams to gather requirements, analyze business needs, and provide actionable insights, improving project delivery timelines.
- Performed statistical analysis and predictive modeling using R and Python to forecast sales trends, achieving high accuracy in predicting quarterly revenue growth.
- Worked with clients to design and implement data governance frameworks, ensuring compliance with data privacy regulations and minimizing risk exposure.
- Managed the end-to-end process of creating, testing, and deploying machine learning models to optimize customer segmentation strategies and improve marketing campaign effectiveness.

PWC

Data Analyst
2019

Feb 2017 – Apr

- Collaborated with cross-departmental teams to gather and analyze business requirements, ensuring that data solutions were aligned with organizational goals and objectives, utilizing tools like JIRA and Confluence for project tracking and documentation.
- Employed advanced data wrangling techniques in Python and SQL to clean, analyze, and visualize data, leveraging libraries such as Pandas, NumPy, and Matplotlib to support key decision-making processes.
- Created and presented detailed reports using Tableau and Power BI, offering actionable recommendations to stakeholders and supporting strategic planning across business units.
- Ensured data integrity and consistency by conducting regular audits and implementing data validation procedures, using tools like Apache Airflow and SQL Server Management Studio to automate and streamline processes.
- Managed and maintained the SQL Server database, ensuring data integrity and optimizing queries for improved performance, reducing query execution time by 50%.
- Collaborated with cross-functional teams (including IT and Marketing) to design data-driven solutions that improved marketing campaign performance by 18%.
- Created and delivered monthly performance reports to executives, providing insights that directly influenced budget allocation decisions, resulting in a 5% increase in operational efficiency.

D-Tech Solutions LLC - Washington DC
Reporting Analyst

Mar 2015 - Feb 2017

- Compiled and analyzed monthly performance reports for key business metrics, ensuring 100% accuracy and timely delivery to senior management.
- Developed automated reporting solutions using Excel VBA and SQL, reducing manual data entry time by 30% and improving data consistency.
- Collaborated with cross-functional teams (Finance, Marketing, IT) to streamline data collection and reporting processes, increasing team efficiency by 25%.
- Created and maintained dashboards using Tableau and Power BI, providing real-time insights into business performance, improving decision-making across departments.
- Performed in-depth data analysis to identify trends and anomalies, resulting in actionable recommendations that improved operational efficiency by 15%.
- Generated detailed ad-hoc reports on sales performance, inventory management, and customer acquisition, supporting the strategic decision-making process for executives.
- Conducted root cause analysis on data discrepancies and resolved data integrity issues, ensuring high accuracy in reporting.
- Collaborated with the IT team to optimize database queries and improve reporting processes, reducing report generation time.
- Presented monthly reports to stakeholders, summarizing key findings and making recommendations that influenced business strategies and operational improvements.
- Monitored and tracked KPIs across multiple business units, ensuring accurate and up-to-date data was available for decision-making.
